- Quiz on Friday
  - Oxygen demand
  - Section 5.4 in text
  - Lecture material: last Friday, this Monday and Wednesday
- Midterm Semester Responses in your boxes.

# Self Reflections

“I spent time going through all the material on the exam blueprint and doing practice problems from all of the homework sets to make sure I was comfortable answering all types of problems. Furthermore, I spent considerable time making sure I had the conceptual fundamentals down, and I thought that by doing this, it helped me on the exam.”

“For the midterm, I made note cards, re-did every homework assignment and every problem we did in class, so I felt well prepared when going into the test. After getting my test back, I made sure to understand my mistakes on the test so I understand these concepts for the final.”
